# Swords

By Rodolfo Kurchan and Jaime Poniachik

En garde! Playing with swords can be dangerous, but we know you can out it. Each board below is crossed all over by swords of differing lengths, with no empty squares. The numbers indicate how many blades lay on each row or column. The blades can sprout either from the hits or from the edges of the board. No two blades line up tip to tip and no blades point at a hit. Also, some hits may not carry a blade. Can you figure out where all the swords lie? ANSWERS, PAGE 75
